Projects & Activities:

- Hostel Management System   November, 2018
  Key Feature –
  Hostel Management System" this is the best way to apply for the outpass to go outside from the campus. In this application student can easily apply outpass at any time and in parallel warden is also having a different login credentials and dashboard to accept or reject the outpass. Once the warden accepts the outpass the student will get a QR-Code which he can show on the gate to scan. On scanning the QR-Code the guard will get all the information about the student. While on reject outpass the student will not get any QR-Code.
  So basically, in this application we have used HTML CSS, BOOTSTRAP 4, JAVASCRIPT for frontend part.
  And PYTHON FLASK, JSON for the backend services

- HR Management System   July, 2020
  Key Feature –
  HR management system fully developed in ph. This management system can help any organization/company to keep the records of employees. There are separate login credentials for admin, hr., user, accountants, and managers. Accountants also can keep tracks of employee's salary can add bank details etc. In this management system some features has been added like, loan management, attendance tracking, employee full details with pictures, loan collection and auto calculations etc.

- SMART_APPAREL
  Key Features –
  We have seen people working around the hours and this busy schedule they only happen to have a choice of choosing their apparels over the internet, but the drawback is the size of their products might not fit them. We are here with a solution, we call it "SMART APPARELS", having so less time from their busy schedule, they can use their hand gestures to change between products from their hats to their shoes. they can use this project while shopping and save a lot of time without actually changing dresses. We came up with this idea after looking at the real time issues of malls, online shopping and performing some surveys, technology that we propose to use is based on SPARK AR and simple camera and some specific scripts. Bringing this idea we intend to save the users/customers time, as being customer we know how precious time for customer is.

- Saka International ltd   April, 2019
  Key Features –
  A simple Website for Pharmaceutical Projects which includes Conceptual design, Basic Engineering, Detailed Engineering, Validation of Master Plan, Supply, Installation and Commissioning of HVAC, Clean room, Floor and all utilities.
  Designed using HTML, CSS, Bootstrap and Javascript.
  https://www.sakaint.com/

- Linkers Enterprise   March, 2020
  Key Features –
  Simple Website Design and developed for Linkers Enterprise Ltd.
  Front-end : HTML, CSS, Bootstrap 4, Javascript.
  Database : Mysql
  http://linkersenterprise.com/

- Blood Donation Management System   October, 2020
  Key Features –
  A simple blood donation management system where blood donor and the needy persons can register him/herself free of cost. it has a huge database of blood donors. within a second it can track the needed blood donors. and automatically can send SMS/email to the concern peoples. So now the system will reduce a lot of time to get donors. easily can find a one. Also, there are some features like, donor can be book for some date. And also, if he/she already donated blood within 3 months the system will automatically transfer him in rest room. so, after 3 months he/she can donate blood. So, there will be no complexity, no hassles.
  Used in this project: php, Laravel, mysql, javascript,php mailer,ajax,html,css

- Pharmacy store management system   January, 2021
  Key Features –
  A simple pharmacy store manage system where a pharmacy store owner can track the medicine list, can check expense, income. Automatic notification of medicines expiry date. Can create invoice, generate reports. Can control staffs, salaries etc.
  Used in this project: php, Laravel, mysql, javascript,php mailer,ajax,html,css,bootstrap
